

For over 100 years, Parker has been at the forefront of design, producing some of the best pens in the world. More than fluent tools, they are also there wherever we need them most – always making a contemporary statement, relevant to each generation. This has led to Parker pens achieving iconic status, sitting proudly amongst some of the best-designed and most admired products of the modern era.

Like the car you drive, the watch you choose and the shoes you buy, the pen you use can send a signal about you. The diversity of the broad Parker product range helps different individuals express their progressiveness in different ways.

Parker Warranty

A Parker writing instrument is a precious personal possession, an extension of its owner's personality. For that reason, the Parker Warranty is a very special one. It is our commitment to a lifetime of service in writing and states...

"Your Parker writing instrument is guaranteed against failure due to faulty materials or workmanship throughout the life of the original owner."

PARKER®

"The pen
can create a unique
and interesting portrayal of
quality and distinctive detailing,
through the eyes and actions
of the user. Each form, each stroke
and each hand drawn line presents
itself throughout the pages of this
brochure. Each page, each
range and each personality
has its own story
to tell..."

Every Parker pen is another icon in the making

Writing modes

There are four main
writing modes available
within the Parker range –
Fountain Pen, Roller Ball,
Ball Point Pen and Pencil.

Each mode complements the
others, offering the consumer the
opportunity to use individual modes
or to create a matching set. In addition,
Parker offers a smooth writing Gel Ball
Point refill that fits all Parker Ball Point Pens.

Fountain Pen

The ink flow is controlled by a precision-engineered feed and collector system. A choice of fountain pen nibs and nib grades are available to suit individual writing styles.

Roller Ball

Using a free ink system that is similar to that of a fountain pen, a sophisticated feed and collector system carefully regulates the flow of ink to the writing point that allows the user to write with the lightest of touch.

Ball Point Pen

A textured tungsten carbide writing point gives clean, clear writing on most surfaces. A gel ball point refill is also available that offers consistently smooth writing and intensity of colour and fits all Parker ball point pens.

Pencil

A strong, reliable continuous lead feeding system that is easy to use. Within each pencil there is a supply of spare leads plus a replaceable eraser.

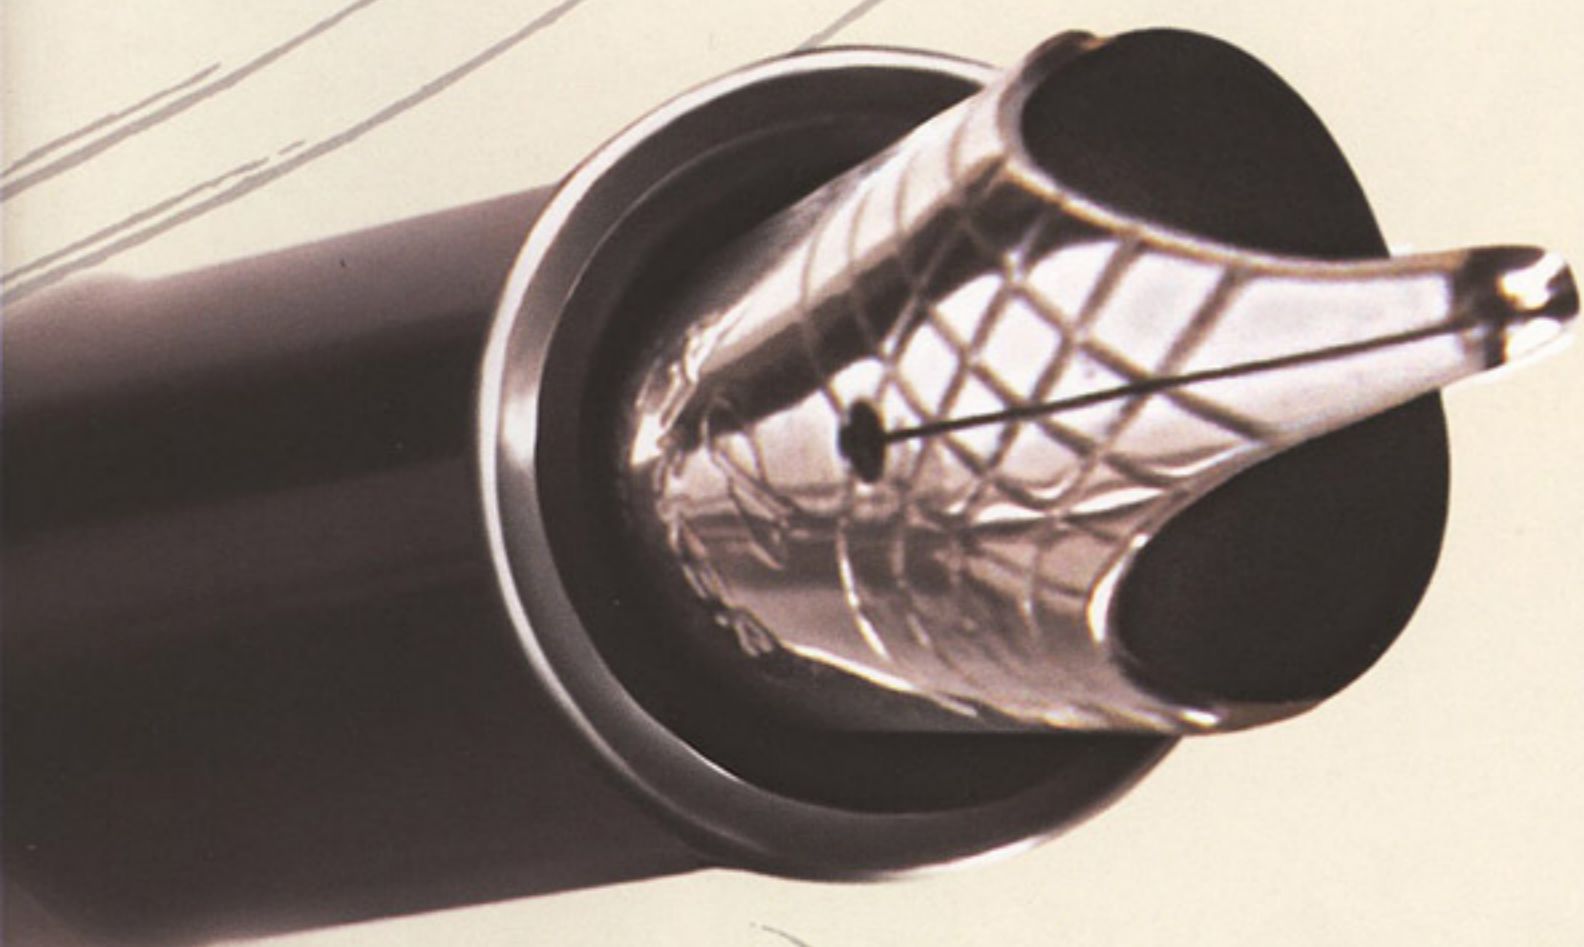

PARKER®

True icons in the making...
a distinctive Parker Collection

With a sense of excellence,
outstanding craftsmanship and exquisite
character, iconic pens that create
the ultimate writing experience.

DUOFOLD

Fountain Pen [FP]

- Extra Polished, 18K gold nib highlighted with platinum.
- Extra Polished, 18K gold nib with all-over platinum plating (Presidential Esparto Sterling Silver only).
- Standard nib grades available in extra fine, fine, medium and broad. Non-standard nib grades available including needlepoint, extra broad, extra extra broad, oblique, reverse oblique and straight italic (see Nib Guide on page 29).

PARKER®

A symbol of strength & commitment
in the modern era...

The perfect combination of authentic
quality and effortless style. A range of high
performance pens with a refined design that
can be trusted. The classic accessory.

Latitude

simply expressive, uncommonly you

Fountain Pen [FP]

- Two nib styles: 23K gold plated stainless steel and stainless steel.
- Standard nib grades available in fine and medium. Non-standard nib grades available in extra fine and broad.
- Fitted with twin-channelled ink feed and collector system.
- Fitted with standard piston fill converter for bottled ink.
- Convertible for use with ink cartridges.

Roller Ball [RB]

- Cap on/cap off, supplied with standard roller ball refill.

Ball Point Pen [BP]

- Twist action, fitted with standard ball point refill.

Pencil [PCL]

- Two-stage, twist action continuous feed pencil – first stage lowers the lead support tube, second stage the lead itself.
- Lead and support tube retract fully to prevent snagging.
- Cushioned mechanism and support tube combine to minimise lead breakage.
- 0.5mm HB leads and replaceable eraser (Type ELT5).

Latitude embodies a highly original, non-conformist individuality. In form and ornament, it rebels against traditional convention whilst retaining an unrivalled quality inherent to a Parker pen. It is a unique alternative, an enigmatic article.

Shimmery Copper*

A fierce, vibrant colour, achieved through the application of multiple coats of a metallic lacquer onto a stainless steel base. An elegant circular pattern subtly decorates the cap. Complemented with 23K gold plated trim and an engraved 23K gold plated, stainless steel nib.

Needlepoint An extremely fine point for precise figure work. Not intended for general writing.																		
Extra Fine For fine line writing with a light touch																		
Fine Excellent for general writing and note taking. Moderate pressure produces a fine line.																		
Medium For average writing pressure, average line width. General all round use.																		
Broad A heavier, rounded point for wide lines.																		
Extra Broad A large rounded point excellent for heavy lines and bold signatures.																		
Extra Extra Broad Developed for people who like to write boldly and rapidly and want a special flourish to their signatures.																		
Oblique Nibs Fine Medium Broad																		
Reverse Oblique Nibs Medium																		
Straight Italic Nibs Fine Medium Broad																		

All nibs are subject to availability. Calligraphy nibs are available in fine, medium, broad and extra broad for Vector range but may vary by market.

Nibs

Regular Nibs

These nibs have a rounded shape at the tip of the writing point which gives smooth, free flowing writing as well as a uniform writing line. They are suited to any style of writing, both left-handed and right-handed.

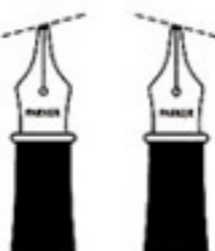

Straight Italic Nibs

Italic nibs are manufactured with a sharp, straight cut tip and finished with a flat pellet. This gives a thick line in one direction and a thin line at right angles to that direction as necessary for the italic style of writing.

Oblique Nibs/Reverse Oblique Nibs

The nib is precision cut obliquely to compensate for extreme writing angles. The nib is fitted with a rounded pellet which allows the pen to write smoothly in all directions.

Parker Nib Exchange

If the nib of your Parker fountain pen is not entirely suited to your hand, and provided it is undamaged, it may be exchanged free of charge, for any nib of the same value, through any accredited Parker dealer, within 28 days of purchase. A comprehensive choice of nib grades is available.
